

MINING DEPARTMENT OFFERS TO THE OTHERS:

Pre feasibility and feasibility studies on mine opening and exploitation (on Mining and Exploitation Permits receiving);

Environment impact assessment;

Report on geological-engineering and exploitation projects of river-bed gravels;

Technical projects for horizontal, vertical, capital working in mines (shaft and decline), with different length;

Technological projects on mine working construction such as horizontal, decline and vertical working;

General ventilation projects of mine;

Secondary ventilation projects;

Mining transport projects;

Compressed air supply projects and its net;

Electricity supply projects;

Wet drilling projects and water supply net;

Dewatering and water pumping projects;

Mining method project;

Facilities and building technical projects;

Minerals treatment technological studies;

Minerals treatment technological projects;

Treatment plant appliance projects of different minerals;

Different minerals dame projects;

Some other different scale services;

Topographical survey in different scales;

Civil and industrial objects landmark;

Power electricity supply lines profile of high and low voltage;

Water supply facility profiles;

Road construction projects and profiles design.
